## Letter from the Director

---

Finoak is a dynamic online retail platform that uses its team's expertise and experience to collect innovative solutions to everyday living needs. It is a place where discerning customers can find improved design in terms of material, function and style, from all the best and newest brands and always at a price that means fantastic value.

Alongside our retail platform, Finoak is also the proud owner of four contemporary home and lifestyle brands with superior selling points, which we are looking to distribute to reputable retailers around the UK and abroad.

All our brands have one thing in common: they provide better solutions to simple design needs. Our focus is on affordable innovation. We keep afloat of the latest trends and tribulations of a modern lifestyle and aim to solve them. The solutions we offer are not quick fixes: they are durable and well thought through.

Our fantastic customer service extends to all our customers, big and small, and we keep our customer promise, to ensure that we respect your margins. Our small close-knit team works efficiently to keep costs down without compromising on quality. Together, your business and our brands can grow.

We protect the margins of our distributors by managing similar retail price levels for every retailer and by providing geographical exclusivity. It is easy and comfortable to work with us. We provide quick deliveries, easy returns and instant transactions.

We look forward to working with you,

**THOMAS CLARKE**  
Director

Smarter Ecology, Innovative Products

# About Us

---

Woodquail caters to your modern needs using ancient materials. We combine innovative production methods with a sacred respect for planet Earth. But at the end of the day, we simply make products for the modern home made from bamboo.

Woodquail's underlying principle is simplicity. Modern life can be more stressful than it needs to be and our aim is to provide a little help along the way. Woodquail is about creating stylish products with simple applications.

We are interested in original technology – not the so-called hi-tech computer stuff, but the technology of nature, the first unsurpassed inventor. Bamboo is a durable and strong but flexible plant. We use these inherent qualities to your benefit, acting as a responsible middleman between you and the South-East Asian forests.

Environment, innovation, style - that's the formula.

## Eco Friendly

Why bamboo? It is an eco-friendly, very high-quality durable and flexible wood.

Bamboo grows at rates of up to five feet a day and is harvested only after five or six years, making it one of the most sustainable materials available. We only use mature bamboo from forests that are carefully maintained, avoiding deforestation and soil erosion and ensuring the protection of the surrounding wildlife and natural habitat.

Bamboo produces 35% more oxygen than average trees. It is a hygienic and water-resistant material. It is also incredibly strong: 34% stronger than white oak.

We aim to save 10,000 trees in 6 months.

## Versatile Aesthetic

Using bamboo also gives our products their distinct yet versatile aesthetic. Like chameleons, they adapt to their natural environment. They won't demand your attention yet will command it from the discerning eye.

We have observed that there is an increasing appetite among homeowners for the simultaneously practical and stylish. Often a premium on space and money means that homeowners fall short of realizing this ambition. The fresh, light, airy aesthetic of bamboo - as well as its inherent qualities - provides a solution to the problem of combining functionality with style.

Our bamboo range is sleek and understated, designed to blend in with a variety of interiors. The products will add effortless cool to any room.

Hassle-free Beauty

[www.saffronstem.com](http://www.saffronstem.com)

# About Us

---

Saffronstem is a unique range of artificial flowers inspired both by the beauty of nature and the ease of technology.

Saffronstem is about delivering easy beauty. We want to help you enhance your home while taking away the usual hassle. This means no mess, maintenance or repairs - leaving you maximum time to enjoy the beauty of your home.

That is the great thing about artificial flowers - they are completely hassle-free. Gone is the need for constant watering and the pruning of dead foliage. Artificial flowers are ready-made, require no looking after and always keep their shape. No time or energy is wasted on making sure that the flowers remain attractive, which makes Saffronstem the perfect option for busy households.

## The Ease of Technology

Our breakthrough was replacing the traditional silk used in most artificial flowers with latex. Using silk can leave the flowers looking tired after extended periods of time. Latex is a modern update and ensures that the flowers stay in good shape for longer.

The use of latex gives our flowers the advantage of actually feeling as well as looking 'real'. Creating the right textures and shades was crucial. It's the details that count. We also realised the importance of flowers staying vibrant and continuing to add colour to any room in the home.

Our purpose is to transform artificial flowers into a highly desirable classy modern convenience.

## Hassle-free Beauty

The problem with natural flowers is that they require much attention, sometimes more attention that you have time to pay. The beauty of natural flowers can sometime be lost if they create too many problems.

This is where the subtle genius of artificial flowers comes in. They provide the same beauty as found outdoors, but without the difficulties of keeping natural flowers. It is an ideal hassle-free permanent alternative that still harnesses the beauty of nature.

Although we don't have as much variety as can be found in nature, our wide range ensures that we can cater to individual tastes and needs, from lavish celebratory centrepiece flower arrangements to a simple and discreet indoor potted plant on a mantelpiece. Style, as well function, is at the forefront of what we do.

# About Us

---

Quentons has a simple mission: to give you the tools that make cooking as straightforward as possible.

We wanted to create a cooking experience that was easy and accessible in equal measure. It acknowledges that the daily task of cooking is a balancing act between quality and time. Within that equation, Quentons has removed common problems so you can focus on what matters – the cooking.

Good technique is what we want to focus on. We believe it takes the hassle and stress out of the kitchen. It makes food preparation simple allowing you to focus on cooking the dishes you want.

## Cutting-edge Technology

Quentons brings professional cooking technology to your kitchen at an amateur price. Our alternative use of high-quality materials keeps knives sharper for longer.

After much trial and error we honed in on two materials that we believe enable the humble knife to perform its duty to its utmost capacity: Damascus steel and ceramic.

We were inspired by the manufacturing history of Damascus steel – a history of perfection. It was developed using the same techniques as ancient Middle Eastern sword making – a technique famous for producing a mottled pattern as several layers of steel are combined to ensure the steel retains its strength. The natural properties of ceramic lend themselves to knife making: it is a flexible as well as strong material, thus making a refined blade a possibility.

All our knives are ergonomically designed with trimmed and smoothed handles that feel light and comfortable in the hand while preparing food.

## Sharper for Longer

The irony is that a blunt knife can be more dangerous than a sharp one in the kitchen. Our knives remain sharp with prolonged usage without the need for constant sharpening, grinding and toil.

We have designed a knife range that delivers ultimate cutting efficiency. Our sharp blades mean that slicing and dicing is made easy and effortless. Relentlessly sharp blades give the user confidence to undertake more complex tasks and encourage creativity.

A bad workman blames his tools, but a good one knows and cherishes a correct tool when he sees one. Your cooking can only be as slick as the tools you use.

Waterproof, not Risk - Averse

[www.drybagtechnology.com](http://www.drybagtechnology.com)

# ABOUT US

---

DryBag was inspired by stories of travel and adventure, but we wanted to give people the opportunity to explore the world with modern comfort strapped to their backs.

DryBag aims to facilitate your next big adventure, whether this is a getaway weekend rambling around the countryside or an arduous journey to distant lands.

We have bags for all travel purposes, even for the adventure of discovering the daily extraordinary right outside your doorstep. Our simple stylish designs suit the urban explorer as much as the hard-core trekker.

DryBag provides you with a little extra reassurance when you leave your comfort zone and encourages you to go wild when you're in it.

## 100% Waterproof

Our bags are 100% waterproof. We use a highly durable and flexible PVC material that is über water-resistant and dries extremely fast. We also employ an innovative thermo-welding technique that eliminates the possibility of any gaps where the material is joined together at the corners and edges of the bag.

The joints are welded together: this creates a watertight seal around the edges. It removes the need for stitching and creates a seamless minimalistic design.

All our bags are ergonomically designed with your health and comfort in mind. We know that comfort and back support are of the utmost importance when travelling. The way the bag fits and feels is, of course, crucial.

Our bags are easily adjustable and have correctly placed chest straps that help support posture. The way they are designed takes the pressure off your shoulders and off your mind. Our bags can't do everything to improve your posture, but they make good habits easier to keep.

## Affordable Adventure

The bags are fitted with a unique 3D Air Mesh material that adds an extra layer of cushioning to the interior. This is vital in providing added stability and ensures that the lumbar area is fully supported. It also helps ventilation, helping to cool the body down on long journeys.

We recognise that for every adventure you need a slightly different bag, whether that be in size or function. Our wide range of bags means that you're guaranteed to find the right bag for your travel needs and purposes.

Our bag sizes range from 1.5 litres to 92 litres and we have a variety of styles and colours – ranging from a bright yellow bulky number to a sleek neutral sporty rucksack - to suit various aesthetic preferences.
